OBJECTIVE

Full-Stack Developer (Django) — Final-year Computer Science student with hands-on, project-proven experience building complete, production-ready web platforms using Django, Django REST Framework, PostgreSQL, and React. Skilled in designing secure REST APIs, enforcing role-based access control, integrating payment systems, and delivering fully tested, deployment-ready applications. Seeking a Full-Stack or Backend (Django) Developer role to apply this hands-on experience to building reliable, scalable software.

EDUCATION

Bachelor of Science in Computer Science

Faculty of Computers and Information, Mansoura University

2023 – 2027 (Expected) | Cumulative Grade: Very Good

COURSES & CERTIFICATIONS

- Django for Web Development — Udemy
- Django REST Framework — Advanced Course — Udemy
- Front-End Development with React — Mahara-Tech
- Database Fundamentals — MaharaTech — ITI
- Microsoft SQL Server — Online Course
- Red Hat System Administration I (Linux) — MaharaTech — ITI
- OWASP Top 10 (Web) 2021 — MaharaTech — ITI
- Python Essentials 1 — Cisco × OpenEDG Python Institute

SKILLS

- **Languages & Frameworks:** Python, Django, Django REST Framework, JavaScript, TypeScript, React
- **Databases:** PostgreSQL, MySQL, SQL Server, Django ORM, Query Optimization
- **APIs & Auth:** REST API Design, JWT Authentication, Rate Limiting, Stripe Payment Integration
- **Security & Testing:** OWASP Top 10 Practices, Input Sanitization, Automated Testing (Unit & Integration)
- **Tools & Platforms:** Git & GitHub, Linux (Red Hat), Docker (Deployment Config), Postman, Celery, Redis, Django Admin
- **Other:** Framer Motion (Animations), Agile/Sprint-Based Development

PROJECTS

Sarab — Full-Stack Restaurant & E-Commerce Platform (Solo)

- **Role:** Full-Stack Developer
- **Problem Solved:** Built a complete system covering the full restaurant customer journey — online ordering, table reservations, payments, and order tracking — backed by a role-restricted admin dashboard.
- **Tools:** Django, Django REST Framework, Stripe, PostgreSQL
- **Link:** <https://sarabfood.pythonanywhere.com/>

CineMatch — AI Movie Recommendation App (Frontend)

- **Role:** Frontend Developer (Team of 3)
- **Problem Solved:** Built the entire React frontend for an AI content-similarity movie recommendation engine, making AI-driven results feel fast and easy to act on.
- **Tools:** React, JavaScript, Framer Motion
- **Link:** <https://github.com/mostafamohamed521/Cinematch.git>

SentinelX — AI Agent Security Platform (Frontend & SDK)

- **Role:** Frontend Developer & SDK Author (Team)

- **Problem Solved:** Built a React/TypeScript monitoring dashboard and the official Python SDK enabling AI agents to report runtime behavior for security analysis.
- **Tools:** React, TypeScript, Python (SDK)
- **Link:** <https://github.com/mostafamohamed521/sentinelx.git>

GymX — Gym Management Ecosystem (Solo)

- **Role:** Full-Stack Developer
- **Problem Solved:** Built a 22-app digital operating system for a fitness business supporting 5 user roles with enforced role-based access, full business operations, and AI-driven insights.
- **Tools:** Django, PostgreSQL
- **Link:** <https://github.com/mostafamohamed521/GYMX.git>

Eflyer — E-Commerce Storefront (Solo)

- **Role:** Full-Stack Developer
- **Problem Solved:** Built a 35-page storefront backed by a complete REST API; ran a security-hardening and self-audit pass that found and fixed real race-condition bugs before deployment.
- **Tools:** Django, Django REST Framework, PostgreSQL, JWT
- **Link:** <https://github.com/mostafamohamed521/Eflyer.git>

QR Forge — QR Code Generator (Solo)

- **Role:** Full-Stack Developer
- **Problem Solved:** Built a QR code generator supporting 8 QR types with custom styling and a saved generation history.
- **Tools:** Django, JavaScript
- **Link:** <https://qrforger.pythonanywhere.com/>

LANGUAGES

- **Arabic:** Native
- **English:** Intermediate
